

# Project: Bender Park Dredging

- Location: Oak Creek, WI
- TOTAL Project Value: \$ 305,000
- Hoffman Landscape Project Value: \$20,000
- Our construction time line: 2011
- Status: Completed

## Scope of Work:

The boat launch at Bender Park in Oak Creek is widely used by boaters from throughout the region, but was closed after boats kept getting stuck. Merrymen Excavation, a General Contractor hired by the Milwaukee county removed sediment and opened up a channel 45 feet wide.

Hoffman Landscape LLC was contracted by Merrymen Excavation for erosion control and turf restoration service. Our scope was to install and remove around 700 LF of silt fence, seed removed sediment which was placed in a stockpile.

We've seeded with the Native Grass Seed and placed Curlex I erosion control blanket on apprx. 8,000 SY of surface. Areas were prepared for seed, seeded with the tractor and covered with erosion blanket for erosion protection.
