

Project: Durham Drive Reconstruction

- Location: Muskego, WI
- TOTAL Project Value: \$2,757,000
- Hoffman Landscape Subcontract Value: \$50,000
- Construction Time Line: 2011
- Status: In progress

The City of Muskego's Durham Drive Reconstruction Project started on April 11, 2011. The project will accommodate increased traffic, improve roadway safety, bridge existing recreational paths in the area, and improve storm-water management along Durham Drive from McShane Drive to S. North Cape Road.

Hoffman Landscape was subcontracted by C.W. Purpero for erosion control services such as silt fence, silt sock and rock filled bag installations. Turf restoration included hydroseeding alongside the roads and recreational paths.

Our total scope included installation of over 10,000 LF of silt fence and hydroseeding of around 40,000 SY of turf areas.
